Note:—*Story's Commentaries* is still the standard legal exposition of the constitution as it was before the civil war. Fundamentally he holds that the constitution is a government, established by the people, and not a compact between states. See in this connection the speeches of Webster on Foote's resolution. For more elaborate presentations of the states rights view of the constitution the works of Calhoun and Alex. H. Stephens may be consulted. For an able but bitter review of the shortcomings of the national government in its dealings with nullification and slavery, see Von Holst's *Political and constitutional history of the U. S., to 1830*. Excellent surveys of colonial self-government, and tendencies to union, before the adoption of the constitution, are given in the introduction to the 1st volume of *Story's work*, and in *Frothingham's Rise of the Republic*. As a philosophical student of the political and social institutions of the country, *A. de Tocqueville* is still pre-eminent.—*Brooklyn Catalogue*.

— Speech on conciliation with America. [<i>Works</i> , v. 1. 1866.]	625	<i>Note on works on the revolution:—Bancroft's is the most elaborate history of the revolution. He is admitted even by unfriendly critics to have been 'as indefatigable in research as confident in theorizing,' while some pronounce his work to be 'not merely a narrative, but a philosophic treatise, dealing with causes and principles as well as events, and treating with remarkable skill the progress of enlightenment and liberal ideas.' He has been accused of doing injustice to such prominent generals as Greene, Schuyler, and Sullivan, and to Joseph Reed. Irving's <i>Life of Washington</i> is the most attractive standard history of the revolution for general readers. <i>Lossing in his 'Pictorial Field-book'</i> illustrates with pen and pencil the history, scenery, and local traditions of the struggle. His 'Seventeen hundred and seventy-six' is an earlier and more concise narrative. <i>Ludlow's War of independence</i> is an excellent one-volume history, for young or old, and <i>Abbott's Paragraph history</i> is highly commended. <i>George W. Greene's</i> historical works are in high repute.—<i>Brooklyn Catalogue.</i></i>

THE library is steadily growing in size. Several hundred volumes have been placed upon the shelves since the manuscript of this catalogue was sent to press.

All additions to the library are at once rendered accessible to the public by the CARD CATALOGUE in the librarian's office. And, hereafter, annual bulletins of the new books will be issued, uniform with the present catalogue, and intended for binding with it.

These bulletins can be obtained from the librarians, and thus, with a little attention, purchasers can always have in their possession a complete catalogue of the library.
